

# Burn1™

## WHAT:

Burn1 is a new cryptocurrency known as a community-driven charity token for Cannabis equality & empowerment. *We are the first **charity crypto** that supports **cannabis advocacy groups**.*

We are looking for **partners and supporters** to back Burn1 and help us raise awareness of our coin.

## WHY:

We wanted to integrate cannabis and crypto, and we saw a way to overlap the two with an innovative idea.

Burn1 developed a living breathing token that auto-generates funds for both marketing and charity. Our coin is set up to make money for both coin-holders and cannabis advocacy organizations in need.

We call it “**capitalistic philanthropy.**”

## HOW:

When someone buys or sells Burn1 coins, we apply a **3% charity allocation tax**. Burn1 takes that **3%** of every transaction and donates USD to cannabis reform organizations. Even if coin value goes down, dollars are still being donated. But with high investor volume, as our market cap goes up, it will generate lots of money for charity,

## OUR MISSION:

Burn1's mission is to raise awareness of the issues in the cannabis industry that need reform, highlight organizations that are doing the work to make a change, and support them by being their **financial rocket fuel**.

## WHAT YOU CAN DO:

Ways to support:

- *Becoming an advocate for the coin and our mission*
- *Sharing on social media*
- *Spreading the word within your circle*
- *Connecting our team with anyone who can help*
- *Buying Burn1 coin - get in early to see the gains!*
