What is Burn1?

The First Charity Token to Support Cannabis Reform & Advocacy.

In a day and age where cannabis is legalized in many places there are still tens of thousands of people facing life imprisonment for cannabis related crimes, we feel that something must be done on a larger scale. As a growing community of cannabis enthusiasts, we have built the first ever cryptocurrency to automatically generate funds for non-profit organizations, individuals and corporations. Our aim is to become the financial rocket fuel that assists those that provide support to people and communities affected by cannabis-related issues.

To further support our partnerships we will use our social media platforms to engage, educate and inform the public about social, racial and socioeconomic inequities, related to cannabis laws, within governmental systems. Our messaging will also provide a means to connect our holders with actionable organizations so that they may engage in activism within the cannabis space.

We are also partnering with growers, manufactures and producers of THC, CBD and edible products to create the first cannabis focused token governance system that will allow our community to take part in branding of cannabis related products!

We are developing an NFT marketplace that is focused on cannabis! So many exciting possibilities and the most exciting of them is knowing that you are here to Burn1 with us!

Let's Burn1 and many more.

Peace,

The Burn1 Team

Tokenomics

Burn1's initial circulating supply is 1 Quadrillion tokens.

Upon Purchase there is a 10% fee embedded within each transaction

3% Sent to a Burn1 wallet for charity donations. Being able to dedicate a considerable amount of our trading volume towards real, impactful charities is what will help us to make a significant difference.*

2% Given back to reward holders – We believe this project will be a long term project that is why we want to reward anyone who stays for the ride with us.

2% Sent straight to locked liquidity - With guaranteed liquidity it will make the coin easier to trade.

2% Sent to Burn1 wallet for marketing. Burn1 is different from other tokens in that it has a considerable portion of transaction fees going towards marketing.

1% Burned away forever - Once again if you're here for the ride we want your coins to become more valuable to you, by decreasing the supply over time this is how we can accomplish that.

1% Community Wallet. This wallet is to be used by Burn1 for the benefit of the community as buy back, liquidity, burning or brand ambassador buy in.

We will never get high on our own supply

All the liquidity for this token is locked permanently. This is to ensure that no matter when you want to leave or buy you will have the chance. There are small dev wallets that cover the time spent in developing this project and the time and care taken to develop integral and deep relationships within the cannabis space. We want to have Burn1 products in head shops, dispensaries and merchandise available online. We are thinking big. Our goal is to integrate the Burn1 currency into the everyday lives of the cannabis space.

Roadmap

Startup

Burn1 was originally fair launched at 4:20PM PST on May 7th, 2021

- Development of Burn1 concepts and road-map
- Development of Telegram and Discord communities
- Pre-launch Social Media Campaign
- On launch we burned 420 trillion tokens to spark up this project

- Burn1 NFT Marketplace
- Burn1 CBD release
- Burn1 Wallet. Mainstream app that allows for easy buying of Burn1
- Fundraiser campaigns with partners
- Further Develop roadmap for Burn1 integration as a currency within dispensaries

2022 and beyond:

- Burn1 Edibles release
- Burn1 Strain release
- Burn1 strain seeds release
- Develop Burn1 connection to dispensaries and headshops

Our reasoning behind not renouncing

We have seen first hand when problems arise with a smart contract and feel it is our obligation to safeguard Burn1 and its holders. Smart contracts are immutable, meaning they cannot be modified once ownership is renounced, and we are here to protect this project long term.
